

es.deusto.spq.jdo.Parking
Test.testSetName

```
graph LR; A["es.deusto.spq.jdo.Parking  
Test.testSetName"] --> B["es.deusto.spq.jdo.Parking.getName"]; A --> C["es.deusto.spq.jdo.Parking.setName"];
```

The diagram illustrates a test method, `Test.testSetName`, which is part of the `es.deusto.spq.jdo.Parking` class. This test method is shown in a grey box on the left. Two blue arrows originate from the right side of this box, pointing to two separate white boxes on the right. The top arrow points to a box containing the code `es.deusto.spq.jdo.Parking.getName`, and the bottom arrow points to a box containing the code `es.deusto.spq.jdo.Parking.setName`. This indicates that the `testSetName` method is testing both the `getName` and `setName` methods of the `Parking` class.
